REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 18 | THE REDCLIFF REVIEW | THURSDAY, APRIL 3rd, 1930 | Number 4

Summer Schedule for C. P. R. Starts May 18

According to New Schedule No. 3 Will not Stop here.

The change to the C. P. R. Summer Schedule for passenger trains is billed to take place on May 18th. The Slogan for the new Schedule will be; "five train a day each way.

According to the new time table there will be very little change in the present time numbers 1, 2, 3 and 4 pass through here. No 1, west will be a little earlier but, no 3, as at present. is not billed to stop here.

On the date above mentioned Nos. 7 & 8 ,the Transcanada, 13 & 14, the Mountaineer, and 5 & 6 the Soo Pacific, will be added with much the same Schedule as last year. None of these trains however, will do any local business as they only stop at the larger centres from coast to coast.

That no 3 is not billed to stop here as has been customery on the summer Schedule, will be a great disappointment to the several industries in town. Since the rapid growth and expansion of our industries here during the last few years has made train and mail service more important than ever for the successful carrying on of their business, it is unfortunate that these things so necessary for western industrial development should be sacrificed for Eastern passenger traffic.

At the present time Redcliff has five travelling salesmen revresenting the industries located here. These men travell all oevr the four western provinces taking orders for their respective plants. This makes the matter of train accommodation and mail the more important.

It appears strange that a town from which the C. P. R. gets so much freight traffic every year should not receive more consideration from the company in the matter of passenger and mail service.

This is a matter which should be taken up with C. P. R. official by the manufacturers' Association on the commercial travellers' association before the final draft of the new schedule is issued.

The Bry Lake U. F. A. announces a dance in their new hall on Saturday evening April 5th. Medicine Hat music will be provided. An invitation is extended to attend.

* * *

Fourteen ladies from Gordon Memorial W. M. S. attended the Presbyterial held in Medicine Hat Wednesday and were present at morning, afttroon and evening meetings. Mrs. E. H. Sellhorn, of Redcliff, was elected first vice president,

* * *

Warnings are again being issued against prairie fires. As the prairie is now quite dry a fire once started would spread rapidly. Townspeople should also exercise caution in burning rubbish and seeing that the lots around the buildings are kept free of weeds.

* * *

Activities on Broadway and Third street remind us that spring cleaning time has arrived. It is to be hoped these activities are contageous and spread to other parts of the town.

Women to Get Painting of Mrs. McKinney

Women of Province asked to Contribute to the Fund

The women of the province are full of enthusiasm over their project of having the portrait of Mrs. McKinney painted and presented to the Legislative Building at Edmonton, and hope to have this accomplished before the end of this year. Mrs. McKinney has been chosen for this honor on account of the fact that she was the first women to be elected to any Legislature Assembly in the British Empire, when in 1917 she was chosen to represent the constituency of Claresholm.

The arrangements are in charge of a committee of 23 women covering the province, and they are asking every women in Alberta to subscribe to the fund.

Contributions, big or little, will be appreciated and acknowledged by the Treasurer, Mrs. Wilbur Horner, 815—19th Avenue West Calgary.

REDUCTION IN WHEAT ACERAGE IN U. S. A.

A campaign to withdraw two millions of acres from spring wheat production and substitute other needed crops was launched at a conference between Chairman Alexander Legge of the Federal Farm Board, and Dr. John L. Coulter, chief economist of the tariff commission.

Mr. Jack Osgood motored up from California and arrived here Monday to visit his brother, Alf. Mr. Osgood was one of the pioneers of Redcliff and left here about seven years ago.

* * *

J. W. McDonald, K. C. of McLeod, was selected as leader of the Liberal party in Alberta. He should make a good leader as he went to School with Mrs Hicks who conducts one of the leading Stores here.

* * *

Ice in the river broke up and sailed down stream last Saturday Those living near the river say the breaking up caused a tremendous roar as the oncoming floods broke it up.

New Vicar Appointed For St. Ambrose Church

The Bishop has appointed to the Vicary, of Redcliff the Rev. P. M. Stewart at present Vicar of Milden Saskatchewan. The new Vicar will enter upon his duties on Sunday, May 4th.

EXPECT CUT WORMS IN SISTER PROVINCE

According to letter posted by the Dominion Entomological Laboratory at Saskatoon, Saskatchewan farmers this season may expect heavy crop damage from cutworms, grasshoppers and wheat-stem saw fly.

In the southwestern section of the province, the cutworms are expected to be unusually active, while grasshoppers will be numerous.

Questioned regarding the reports and the outlook for Alberta H. L. Seamans, Dominion entomologist said:

"Southern Alberta farmers have nothing to fear this season. The wheat-stem saw fly does not appear in the south at all, and the grasshoppers will just be normal. The cutworm pest is not expected to break out, although a few patches here and there over the district are always encountered during the season. The northern section of the province seems to be the cutworm's breeding grounds.

Sunday Special at Elite Cafe—Chicken Supper from 5 to 8 with all the trimmings. Price reasonable. ***

Friday and Saturday the Elite Cafe is putting a special— Fish and Chip lunch for 25c. Come in and try them. ***

Air Plant Here Making Progress

The Review is assured that good progress is being made with the organization work in conection with the establishing of a factory here for the manufacturing and assembling of Airplanes. We understand that two large planes will arrive here next week and that immediately after their arrival an aviation school will be started. At the same time plans for operating the factory here will be gone on with.

WILL STOP BABY MARRIAGES IN INDIA

The prohibition of baby marriages becomes effective through out British India, at midnight on April 12. Henceforth it will be illegal for men to marry little girls of seven and eight years of age. Specifically, the new law forbids the marriage of girls less than 14 and boys less than 18 years of age, but the law was aimed at the greater marriage evil which brought upon its Indian proponents the condemnation of many vesterners.

George Weidner received sad news this week announcing the death of his younger brother at Toronto, Ohio.

* * *

The Elite Cafe recently opened in Redcliff reports business growing every day. This Cafe is quite an acquisition to the town and is being run in first-class style

* * *

Two autos of Oddfellows went from here last night to pay a visit to the lodge at Hilda. They all report a pleasant and profitable evening.

Gordon Memorial Observes Anniversary

Last Sunday was First Anniversary of opening of Auditorium.

The first anniversary of the opening of Gordon Memorial Auditorium was observed last Sunday. Rev. W. H. Irwin of Taber, occupied the pulpit morning and evening and delivered two very impressive addresses.

Mr. Irwin is a pioneer of western Canada. He claims the distinction of holding the first Presbyterian service in what is now Redcliff. This was before the town really started and when Mr. Irwin was a Student mission ary. The service was held in a box car near the present Stair Siding, and the Congregation was made up largely of ranchers and cowboys and a few women.

Gordon Memorial paster, Rev. W. B. Smith conducted the services at Taber while Mr. Irwin was here.

At the annual meeting of the Fish and Game Asso. held in Medicine Hat last week, Ed. Wallof was elected as Redcliffs' representative on the Executive committee.

* * *

At a meeting of the local Legion executive held last weekend Donald McLachlan was engaged as Steward for the Club rooms. Donald took over the Stewardship last Monday morning.

* * *

FARM FOR SALE

Half section of land in the East Springs district. Will accept crop paymens plan with small payment down. This is my old farm and it is in good conditon. For particulars apply to Robt. Marty, Sr. Seventh St. Redcliff.

Social Evening Given By Local Masons

Was Well Attended and Pronounced a Huge Success.

The social evening given by the local Masonic Lodge last last Tuesday evening was exceptionally well attended and a thoroghly enjoyable evening was spent. The hall was most artistically decrated for the occasion, with the colors and emblems of the institution, adding much to its brightness and blending nicely with the ladies' dresses.

During the first part of the evening's program pgressive whist was played. For this every availabe space in the hall was required for the tables. The conest was keen and the prizes were awarded as follows: Ladies first, Mrs. G. H. Worts; consolation, G. McKey. Gents' first, Mr. Sibley; consolation George Oakland. Dancing followed the whist and was kept up till 1:30 a m. The music furnished by Bill Lakey's orchestra was all that could be desired. A dainty lunch was served at midnight. The evening was pronounced by all as a huge success.

The general opinion at Edmonton appears to be that we are to have a provincial election some time in June this year.

Churches

CHURCH OF BRETHREN
Rev. Ira M. Zeigler, Paster
Services every Sunday.
Sunday School 10:30 a. m.
Morning service 11:30
Evening service at 7:30.
Choir practice every Thursday evening at 7:30.
Everybody welcome. A special invitation is extended to those who have no church home or do not attend any Sunday School.

7:30 P. M. Evening Worship.
Subject: "Facing Towards Jerusalem".
Midweek Seavice on Wednesday at 7:30 P. M.
Board of Stewards monthly meeting on Tuesday at 8 P. M.

Taking the School to the Scholar

Providing schooling for children in the isolated sections of Northern Ontario long baffled the Ontario Department of Education. The little red school house—if it had been built—would have stood alone with no sign of human habitation for miles around or, if there had been a few houses near, the cost of upkeep would have been too heavy a burden on a few scattered families. So the Canadian Pacific Railway was called into consultation and the result is the travelling school car which has been operated during the winter months with increasing success for the past few years.

Every child loves a train, but when that train comes especially to him and becomes his school—well, you have to go to fairy tales to get the like of that. So they come enthusiastically from miles around, French-Canadians, Rumanian, Indian, Italian, English-Canadian—all races and ages from five to fifteen years of age. They come on snowshoes, skis, by dog team, from near and far. They get the three R's and they get acquainted among themselves. Difference of speech makes little difference to them and soon they are all using English. Children of pioneers, they are bright and adaptable. Lay-out shows exterior of car, interior with class of boys and girls all set for lessons; another interior showing teacher and black board; and two typical school children on their way to the car.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an adult, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet ,the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

The Immigration Problem

The subject of immigration, which is at present receiving a large share of attention by the people of Canada, and causing them no little concern, has always been in the forefront of national policy. It is likely to remain so for many years to come, a result almost inevitable in the case of a young country of small population, vast unoccupied areas, and immense natural resources awaiting development. And especially so when, elsewhere in the world, there are numerous countries where population is already congested and the surplus people are anxiously looking abroad for some place in which to locate with a fair prospect of making a livelihood for themselves and their children.

It is probably true that in regard to no other question of vital national importance has public opinion in Canada, as in the United States, so completely changed within a few years as it has in regard to immigration. Within the last few years the change has been rapid and fundamental, and thousands of men and women today hold views diametrically opposite to those they entertained five or ten years ago. Many of these people are now inclined to blame former Governments because they adopted and pursued policies which do not find favor today, forgetting that they themselves believed in and approved policies then which they condemn now.

Not so long ago Federal Governments were applauded or criticised according as they succeeded or failed to increase the volume of immigration into this Dominion. Almost without a dissenting voice,—organized labor alone perhaps excepted,—the people of Canada urged and demanded aggressive policies of immigration in order to increase Canada's population, develop its resources, fill up the vacant spaces, and assist in carrying the Dominion's heavy burden of debt. Immigration was held to be necessary to provide business for our railways, and to reduce the per capita cost of government, schools, and those many other modern services which people demanded. And all governments tried to supply what the people as a whole wanted.

Now all this has changed, and from all parts of the country there is an intense demand that immigration be restricted, if not altogether stopped, and just as there were extremists in days gone by who favored a wide-open door policy of unrestricted entry, so now there are extremists who would prohibit all and sundry from entering the portals of the Dominion. As is true of almost every question, there is in this matter of immigration a sane and safe middle course.

Generally speaking, the opinion now prevails that all forms of assisted immigration should cease, or at all events should be strictly limited to individual cases of members of a family desirous of coming to Canada to join relatives already established here. The view is also held that there should be no more large movements of groups of people to be settled in communities. It is practically assured that these policies will be adhered to.

Canada's immigration policy has for some considerable time been one of admitting only those, mentally, morally and physically sound, who proposed to go upon the land, while those of the artizan and unskilled labor classes were discouraged. But the difficulty has been to keep those admitted on the land. Many having but little capital and meeting with initial discouragements and difficulties, have flocked to the cities in search of work, with dire results to themselves and to the urban communities thereby affected. How to overcome this problem, made more acute in recent years by the introduction on a large scale of labor-saving farm machinery, as for example, the combined harvester-thresher and the motor truck, and the consequent elimination of the need for thousands of farm hands, is still in acute question.

It is now suggested that immigration should be left to the Provinces rather than continue as one of the major functions of the Federal Government, and that each Province should decide who, and how many, to admit in any one year. But here another difficulty presents itself. Provincial requirements and policies may be far from uniform. One Province may adopt a policy amounting almost to exclusion, while another is much more lax in its policy governing immigration. But once an immigrant is admitted into Canada by any one Province, there is no power to prevent such immigrant from moving to another part of the Dominion. There must of necessity be some understanding reached by the Provinces if any effective restrictions are to be imposed by them, if the present plan of a central Dominion control is superseded.

The whole problem is one calling for the most careful investigation and study. It involves not only economic questions, but social, racial, religious, and other questions, each and every one presenting difficulties in the way of arriving at common understandings. It is a question that calls for the exercise of patience, goodwill, co-operation.

Canada's Natural Resources

Value Of Agriculture Products Increases Fourfold In Last Twenty Years

In address upon "Canada's Natural Resources and The'r Development," in Montreal the other day, G. M. Hutt, development engineer, Canadian Pacific Railway, pointed out that the value of agricultural products have increased fourfold in the last twenty years, while that of mines and forests have been trebled, fisheries doubled and developed water power increased six times times over.

Calgary Woollen Plant

New Plant For Manufacture Of Woollen Goods Is Announced

Plans announced by W. L. Caldwell & Co., provide for the erection of a new plant in Calgary at an approximate cost of $40,000, for the manufacture of woollen goods. This is expected to double the capacity of the present plant, which is now using the equivalent of 15,000 fleeces annually. It is thought likely that a second section of the same size will be added later.

Ontario Gold Mines

The output from the gold mines of Ontario for the month of December last, at $33,383,169, showed a gain of $485,692 compared with November. The figures are from the Department of Mines.

Sweet and palatable. Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

They may be dumb, but a rabbit never marries a wildcat, and a crow never ruins its health digging worms for a bird of paradise

Adds To Consumer's Bills

Milk Dealers Lose Millions Annually Through Unreturned Bottles

Do you use milk bottles for jam, kerosene, paint, and other household articles? Perhaps you use them for flower vases, or in numerous other ways. If they get too dirty, probably they are thrown out with the ashes or trash.

Such a procedure is far too common; says the Bureau of Dairy Industry, United States Department of Agriculture, and adds materially to the consumer's milk bill. The annual milk-bottle bill of the nation is close to $30,000,000, the bureau says, and at least $20,000,000 of this is loss occurring after the bottles leave the dairy. Last year in one large city, junk men picked off the city dumps 20,000,000 milk bottles which had been thrown away. These bottles had a value of over $1,000,000.

SWOLLEN JOINTS GIVE GREAT PAIN

The Trouble Can Be Removed By Enriching the Blood Supply

The chief symptom of rheumatism is pain. Cold or damp weather may start the pain, but it is known that the trouble is actually due to weak, watery blood. The most successful treatment is the one that restores the blood to a healthy, normal condition. Many rheumatic people suffer pains that could be avoided if they would only enrich and purify their blood by taking Dr. Williams' Pink Pills. These pills actually make new, rich, red blood and in this way drive out the poisonous secretions which cause rheumatism. That this is the case is shown by the statement of Mr. A. Oickle, Milton, N.S., who says:—"About two years ago I had a very severe attack of rheumatism. The trouble located chiefly in my hips and legs, the joints swelling so badly that often I would have to sit up in a chair, being unable to lie down. The pain, at times, was agonizing. Finally I decided to try Dr. Williams' Pink Pills and these I found, to my great satisfaction, just the thing needed to relieve me of the misery I was undergoing." Under the use of the pills the swelling subsided, the pain disappeared, and there has not since been any return of the trouble. I am very thankful for what Dr. Williams' Pink Pills did for me, and hope some other sufferer may benefit from my experience."

You can procure these pills from any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

B.C. Telephones

Improvement and Extension Of Service Is Noted

Within two months by the use of a new B.C. telephone all cable route, Vancouver and Victoria will be connected by an additional 25 speech channels. Two direct telephone services will be in operation between Vancouver and Calgary this spring.

Before the end of this year the whole of British Columbia from Hope to the south of the C.P.R. main line will be linked with high grade telephone communication, extending from the Crow's Nest to Vancouver and Victoria.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

Indian Population Increases

The Indian population of Canada has increased by 3,118 during the past five years, according to the five-year census of the Department of Indian Affairs. At the end of 1929 the population stood at 108,012.

Use Minard's for Neuralgia.

B.C. Farm Production

Value of farm production in British Columbia totalled $61,000,000 in 1929, a new high record. This was an increase of $5,000,000 over 1928.

MOTHER OF TWINS HELPED

Restored to Health by Taking Lydia E. Pinkham's Vegetable Compound

Mitchell, Ont.—"I had little twin babies and for quite a while after I was so weak I could not do my work because of pains all the way up my legs at the back. I also had headaches and got very little sleep. I took Lydia E. Pinkham's Vegetable Compound, and soon I was able to get up and do my work. I have taken three bottles and I am fine, do my work without trouble and am gaining in weight and strength. I will gladly recommend the Vegetable Compound to anyone."—Mrs. F. Stayos, Box 220, Mitchell, Ont.

Author Urges Wider Knowledge Of Canada

American Novelist Regrets Peculiar Ideas People In the United States Have

Returning from a visit to Churchill on Hudson Bay, the northerly terminal of the Hudson Bay Railway, Courtney Riley Cooper, American novelist, in an interview at Toronto, urged a wider knowledge of Canada in the United States. Mr. Cooper regretted that so many peculiar impressions of Canada had become prevalent.

"The people of the United States are under the impression that Canada is land of barren, desolate, frozen wastes," he said, adding that when he was a reporter on a Chicago paper he suffered more from the cold than in the Hudson Bay country.

"The minute I went into the north country I became sold on Canada and decided to make my lifework the selling of Canada to the U.S. people through my books," he went on.

He highly commended the Canadian police and said, "The Canadian and U.S. citizen are blood brothers."

Caramel Pudding

A Delicious Dessert That Practically Makes Itself

One of the most delicious desserts one can serve, and it is one especially loved by children, can be said practically to make itself. It is called Caramel Pudding. Here it is:

"Place an unopened can of Borden's Eagle Brand Condensed Milk in a kettle of boiling water and simmer for two and a half hours, being careful not to let the kettle boil dry. Remove can, cool and chill. Remove top of can, cutting along the side of can — not the top — so that the contents may be removed whole; place on a serving dish and garnish with broken nut meats, and whipped cream. To serve individually, cut in slices, garnish with nut meats, and whipped cream—or use plain unsweetened cream, with or without garnish."

Miller's Worm Powders will purge the stomach and intestines of worms so effectively and so easily and painlessly, that the most delicate stomach will not feel any inconvenience from their action. They recommend themselves to mothers as a preparation that will restore strength and vigor to their children and protect them from the debilitating effects which result from the depredations of worms.

Heirs To Vast Estate

Nine Widows and Thirteen Children Share In Estate Of Abdul Hamid

A London despatch to the New York Times states that nine surviving widows and 13 children of Abdul Hamid, Sultan of Turkey, who was deposed in 1909, have obtained after five years legal battle $50,000,000 from his $1,500,000,000 estate.

Greece, it was reported in London, offered $50,000,000 to Abdul's former harem favorites now living in poverty in various capitals of Europe. The Aegean Financial Trust, Ltd., of London, hopes to get for them $1,000,000,000 from Iraq.

Abdul, who died in prison in 1918, was said by some to be the richest man in the world. A number of British and United States financiers have backed the contention of his heirs that confiscation of his properties during and after the Great War was illegal. Greece's offers concerns properties acquired from Turkey under post war treaties.

Product Of One Seed

Nine ounces of dried seed and 1,278 blooms from one nasturtium seed, is the proud record of Gordon Thomas, Royston, B.C. Mr. Thomas saved the seed from plants grown in his own garden in 1928, and on March 10, 1929, it was planted in a favorable location on the south side of his house. The plant was given special attention and bloomed continuously until November 11, and grew to a height of 14 feet 4 inches.

The revised version of "Uncle Tom's Cabin," according to Clyde D. More, of the Ohio State Journal, probably will have Eliza crossing the river on an electric refrigerator.

Grandmother Knew — She Used Minard's.

Glass That Bends

Nearest Approach Is a Glass Substitute Called "Windolite"

There is a fortune awaiting the man who invents a flexible glass. This stands perhaps at the head of the list of necessary things the world is waiting for. So far the nearest approach is a glass substitute called "Windolite," invented in England, and put on the market there in 1917, and now sold in Canada. "Windolite" consists of a cellulose acetate compound reinforced with fine, specially galvanized wire mesh. It is so dipped in the solution as to coat the wire mesh thoroughly on both sides and the resulting substance is therefore completely waterproof, airtight, flexible and practically unbreakable.

One advantage this substitute has over ordinary glass is that it freely transmits the valuable ultra-violet rays of the sun. This quality makes "Windolite" invaluable for a wide variety of uses where real sunlight is necessary to health and growth such as the rearing of young chicks and turkeys in confinement. Ordinary glass shuts out these rays, and yet they are vitally important to human beings, as well as plants, poultry and live stock. Another surprising thing about this glass substitute is that it is cheaper than ordinary glass, and yet extremely light in weight and very strong.

Freedom From Asthma. Asthma is one of the most distressing troubles, sudden in its attacks and prolonged in its agonies. Frequently many things are tried, but nothing seems to give hope of relief. Dr. J. D. Kellogg's Asthma Remedy is the one help which can be depended upon. If you have tried other remedies without success, do not fail to get at once a package of this uniformly successful preparation.

Old Marriage Contract

Drawn Up By Egyptian Husband and Dated 590 B.C.

Marriage contracts were in vogue among early Egyptians, according to tablets found in the Nile region by explorers. The earliest known nuptial contract there dates from 590 B.C., the terms of which were drawn by the husband. It has been translated as follows: "Since God wileth that we should unite one with the other in righteous wedlock, after the manner of every free man and every wise woman, therefore I have given thee four dollars in gold as a bridal gift. And for any part I will not neglect thee. Neither shall I put thee forth without a cause, having legal ground. But should I wish to put thee forth, I will pay 17 dollars for the matter."

Minard's—The Great White Liniment.

Measuring Star's Brightness

With a photo-electric photometer such as the one attached to the telescope at the Dominion Observatory, Ottawa, it is possible to measure the brightness of a star to within one half of one per cent. of its value. This instrument is used mainly for following the changes in the brightness of variable stars.

COLDS

Keep Away

Tonsilitis *and* **Sore Throat Relieved**

Vaporize Catarrhozone in boiling water and inhale the medicated vapor. You get almost instant relief from Colds, Coughs or Catarrh. The throat and nostrils are cleared of discharges and once again you breathe in a natuhal way. For safe, effective healing action use Catarrhozone.

Catarrhozone

A Ten-Minute Relief!

Employment In Canada

Greater In Volume In 1929 Than Any Other Year On Record

Employment in Canada during 1929 was on the whole decidedly greater in volume than in any other year on record, 6,700 reported firms employing a monthly average of 1,020,635 persons, according to the Bureau of Statistics. On December 1st, 1929, the Index (calculated on the average for 1926, as 100), stood at 119.4 and was ten points higher than at the beginning of the year.

Deaf Hear Again Through New Aid

Earpiece No Bigger Than Dime Wins Enthusiastic Following Ten-Day Free Trial Offer

After twenty-five years devoted exclusively to the manufacture of scientific hearing-aids, the Canadian Acoustics Ltd., Dept. 204, 45 Richmond St. West, Toronto, announce the perfection of a new invention that represents the greatest advance yet made in the re-creation of hearing for the deaf. This latest Acoustics is featured by a tiny earpiece no bigger than a dime. Through this device, sounds are clearly and distinctly transmitted to subnormal ears with wonderful benefit to hearing and health alike. The makers offer an absolutely free trial of this device to any person who may be interested, and a letter will bring one of these remarkable aids to your home for a thorough and convincing test. Send them your name and address today.

Humane Society Recommendations

Recommendations for more rigid enforcement of those sections of the Criminal Code pertaining to the treatment of animals, were considered at a special meeting of the Toronto Humane Society. Representatives from several of the other provinces were in attendance, including Miss Marshall Saunders, representing Alberta.

A single mink has been known to catch as many as 80 fish in one night

Needless Pain!

Some folks take pain for granted.

They let a cold "run its course."

They wait for their headaches to "wear off."

If suffering from neuralgia or from neuritis, they rely on feeling better in the morning.

Meantime, they suffer unnecessary pain. Unnecessary, because there is an antidote. Aspirin tablets always offer immediate relief from various aches and pains we once had to endure. If pain persists, consult your doctor as to its cause.

Save yourself a lot of pain and discomfort through the many proven uses of Aspirin. Aspirin is *safe*. Always the same. All druggists with complete directions.

Planning Makes Finer Cities

Village Of Today May Be City Of Tomorrow

It is only in recent years that town-planning has become an expression with which we are somewhat familiar, through reading about it in the newspapers. Town-planning is not, however, a new development. It dates back as far as the early Romans, and it is said that they built their cities with an eye to the number of their people in the future, more than the number of their people at the time.

It is, however, only in recent years that town-planning has become a very active feature of our municipal life. Many cities and towns are appointing commissions to guide the destinies of their municipalities. They work on the principle that the tree will grow pretty much as the twig is bent. The future development of these far-seeing cities and towns will not be by accident; it will be the result of thoughtful arrangement with the health and comfort of the majority constantly in view.

Briefly, town-planning is co-operation between land owners and municipal authorities for the general good of the people.

Its object is to secure conditions that lend themselves to proper sanitation, convenience, healthy and pleasant living arrangements.

Probably the most important consideration, from the standpoint of health, in the laying out of a town or city, are the parks. In Canada, where the number of large centres is comparatively small, growth generally results when a number of industries, for reasons of convenience or costs, suddenly decide to take up their position at one point. The area, thus favored, is apt to grow with great rapidity, and unless the public men are statesmen who think in decades, or even generations, instead of just terms of office, the growth of the new industrial centre from a village to a town or a city is apt to be haphazard. When this occurs, it is as a rule bad not only for the citizens who have to live there, but in time its natural growth is apt to be checked because it is not as pleasant a place to live as some other places have gone more thought to the question of town planning.

Parks are important because they give people opportunity to get out into the fresh air.

The creating of proper parks is usually an economic problem, and the cost attached to it, must of course be considered. Sometimes, in fact as a rule, three small parks, because of the fencing and other upkeep charges, are more expensive than one large one, yet three parks, if they are feasible, are as a rule a better plan, because they can be scattered through the crowded areas and are accessible to more people.

It must be borne in mind at all times, that many people who will benefit most from the addition of parks to a city, will not take advantage of their beauties.

As the industrial centres creep out on their edges, one of two things may happen. The poor classes may be pushed out so far on the other rim, that the transportation problem may become a very serious problem in their lives. Or they may become more and more crowded as the years go by, in the sections closer to the heart of the city, with living conditions becoming steadily worse because of the increase in rents and other living costs.

In large cities where proper preparations for growth and development are not made, such deplorable living conditions are bound to exist. It is here that the intelligent laying out of streets plays a part. If they are planned so that the outside edges of the city are not too hard to reach, the result in a great many cities has been artistic suburb sections where rents are cheap and working people can live in happiness and health.

The habits of the citizens, the nature of the soil, the levels of the land and a hundred other matters come into the scheme of things in town-planning. Some cities have found themselves in a position where they could insist that every house must have a plot of land of decent size around it.

Then of course, there is the question of sanitation which is also a study for our civic officers. It concerns the question of the proper and permanent water supply as well as the final disposal of sewage. We are probably as good at this as any other country of the world, but it must constantly be studied, as conditions vary with each growing city.

"How are bears caught?"

"Oh, quite simply. They just put a ring in their noses and bind them with rope. It is quite easy."—Lustige Kolner Zeitung, Cologne.

Production Of Bacon Type Hogs

Danish Government Officials Conduct Interesting Investigation

Comparative tests and investigations with swine at the pig breeding stations that have the official recognition of the Danish Government, have revealed many valuable facts about the production of bacon type hogs suitable for the export trade of that country. Their main purpose has been to find out the best methods of breeding and feeding hogs so that they shall yield the most desirable sort of carcass from the points of view of conformation, lean-and-fat interlarding, and actual percentage of dead weight to live weight given by different litters, so that they may be traced back to their sire and dam and the best strains thus be preserved for further breeding. In the last year recorded some 2,596 hogs were tested. The work meant that a number of pigs out of selected litters were taken when about eight weeks old and kept under close supervision until they were slaughtered and then the tests were made with all the life facts as a background to see what their value would have been had they been upon the market. On the returns so obtained, were based the recommendations about the probable suitability of the remaining pigs of the litters for breeding purposes.

The Danes have long since found that there is no single factor of production that can be relied on as a rule to make only for the citizens who have to live there, but in time its natural growth is apt to be checked because it is not as pleasant a place to live as some other places have gone more thought to the question of town planning.

Bread and Butter Country

Western Provinces Produce About Ninety Per Cent. Of the Wheat Grown In Canada

Not only do the farms in the three prairie provinces—Manitoba, Saskatchewan and Alberta—produce about 90 per cent. of the wheat grown in Canada, but they now provide a substantial amount of butter to spread on the bread made from the wheat, or for other edible purposes. Last year these three provinces produced a total of 81,977,109 pounds of butter, a big increase over the production in 1928. This was enough to provide every man, woman and child in Canada with over eight pounds. Fifteen years ago the prairie provinces were importing many carloads annually to meet the home demand, now they export hundreds of carloads every year. The province of Saskatchewan headed the list in butter output, in 1929, with a total of 31,280,000 pounds of creamery and dairy butter; Alberta was next, with 27,025,000 pounds, and Manitoba third, with 23,672,109 pounds. Canadians eat more butter than the people of any other country, the annual per capita consumption being about 30 pounds.

Pianist Preferred

Clemenceau's personality was so many-sided that almost every one who came into contact with him has a characteristic story to tell about him. A friend tells me that Paderewski had an amusing encounter with "The Tiger" at the Versailles Conference, at which the illustrious Pole represented his country in the capacity of Prime Minister. On being presented to Clemenceau, the latter, who had been eyeing the new arrival with great curiosity, said: "You are the President of Poland?" "Yes." "The great pianist that was?" Paderewski bowed. "My God! What a come-down," said "The Tiger," abruptly turning away.

Date Was Once Moveable

It may not be generally known that Christmas has not always been observed on the twenty-fifth of December. There was no celebration of the Nativity until nearly 100 years after the death of Jesus. Since then it has been observed on the first and sixth of January, the 20th of March, the 20th of September, the 19th of April, and the 20th of May.

Use Of 'Phones In Canada

More Telephone Conversation In Canada Per Capita Than Any Other Country

Though Canadians may not be originally known as a noticeably talkative people, the fact is they use the telephone more than the people of any other country. A recently issued official report discloses that in 1928 the number of telephone conversations in Canada totalled 2,202,000,000 of which 36,177,000 were long distance calls. This works out at 1,717 local and 27 long distance calls per telephone in the Dominion, or 241 'phone conversations per head of population, compared with 221 in 1927. In the United States the latest available figures show 225 telephone conversations per year per capita. New Zealand holds third place with 179 per capita.

At the end of 1928, there were 1,334,534 telephones in Canada, about 14 for every 100 of the population in the country, equal to approximately one 'phone for every seven persons. Only the United States, with 15.8 'phones per 100 of population, exceeds Canada in 'phone density. In the province of British Columbia, there is a telephone for every five persons or 20.8 per 100 of population. Ontario follows closely with 18.3 per 100 persons and Saskatchewan is third with 13.2 per 100.

The telephone wire mileage in Canada totals 3,982,867 and the aggregate income for all telephone systems in 1928 was $61,791,333, an average of $46.30 per telephone or about 2½ cents per call including both local and long distance calls. Telephones in Canada literally cover the length and breadth of the expansive country. Most of the farm homes in every province have telephone connection locally and to an extensive radius beyond.

The fact that the telephone is a Canadian invention may account, in some way, for its great popularity in the Dominion. It was invented by Dr. Alexander Graham Bell, and demonstrated successfully for the first time on August 10, 1876, over a line that ran from Brantford to Paris, Ontario.

Preparing For Great Event

Iceland's Parliament Attains Thousandth Anniversary Next Year

Ancient Iceland, which is justly proud of its thousand-year old traditions, is, and has, for some time, been busy in preparing for next year's great event, the thousandth anniversary of the Alting, the world's oldest Parliament. The festivities will be great and manifold, and the King and Queen of Denmark will be present. The Northern inter-Parliamentary Union will hold a meeting there in connection with the festivities during the months of June and July.

Many representative delegations from governments and parliaments in all parts of the world are expected, and in their wake large tourist steamers from America, England, Germany, and other countries.

A special feature will be a large muster of students from the other four Scandinavian countries, who will proceed to Iceland jointly; they have already drawn up their program, and will be conveyed to Iceland by the Danish-American liner "Heilig Olaf."

"Do you know that your wife is telling everyone you can't keep her in clothes?"

"That's nothing. I've bought her a home and can't keep her in that, either."

Managing Relief Funds

Is Real Problem For Those Who Are Responsible

One of the trickiest problems anyone could have to work out comes to the Public Trustee when a relief fund is handed over to him to manage. The ideal he has to aim at is that the fund will last as long as those on whose behalf it was raised—and no longer. Figures recently published show that three famous relief funds, instituted by the Lord Mayor of London, and subscribed by all classes of the community, are still functioning. These are the funds arising out of the "Titanic" disaster, the loss of the "Empress of Ireland" in the St. Lawrence, and the sinking of the "Lusitania. The "Titanic" fund, which has been in existence for seventeen years, has a balance of £284,120. There are 387 persons still receiving allowances from it. The "Empress of Ireland" fund, from which 108 persons are maintained, has a balance of £87,138. The "Lusitania" balance is the lowest of the three—only £21,669 is now left, but there are only 24 persons receiving allowances.

England's Highest Elevator

People Can Now See London Without Long Climb

It is now possible on a clear day to see all London in less than five minutes. This can now be done by taking a ride in the new elevator opened recently at the Westminster Cathedral campanile. It is claimed that it is the highest and fastest elevator in Europe, for in thirty-two seconds one is carried to a height of 185 feet. From the top one can see not only every land mark in every part of London, but the distant hills of Surrey, Buckinghamshire, and Hertfordshire. In less than five minutes from starting one is back on the ground floor, having seen London. Before the lift was installed, about 11,000 people ascended the tower every year, but this number will probably be greatly exceeded now that the "climb" has been removed.

Are Economical

That Is the Reason Why the Scotch Wear Kilts

The reason the Scotch wear kilts is because they are economical, according to Col. Colum Crichton Stuart, M.P., a Scotsman himself, and brother of the Marquis of Bute. His reasons for the plaids was told in a story at a Gaelic meeting held at Rothesay, Scotland.

"From a financial point of view," he said, "I can assure you, from a lifelong experience, that I've found the kilt a most economical garment. That's why I say hoch-aye for the kilt."

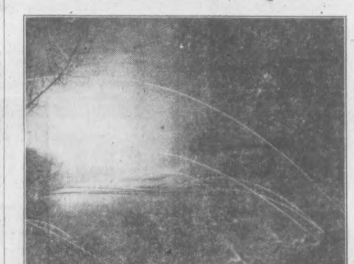
Sea Menaces Naval Base

The German naval base on the Island of Heiligland is threatened with destruction by the persistent wash of the North Sea. The other night a gigantic rock slid from a high plateau on to the lower foreland, narrowly missing a village. The cliffs of this whole island are fast crumbling away, and it is feared Heligoland is doomed to destruction in a few years.

Iron Is Essential

Experimenters have been unable to increase the amount of iron or copper in a cow's milk by giving varying amounts in the ration. Cane of anaemia in calves must therefore be corrected by feeding these two metals directly to the youngsters in their feed.

The Bombardment of Quebec



The Fete de Nuit, at Quebec, one of the features of the Quebec Winter Sports Season, rates as one of the most brilliant spectacles of the Ancient Capital. Hundreds of snow-shoers attack the ramparts and citadel which are defended by the garrison, the famous "Van-Doo" or Royal 22nd French-Canadian Regiment, to the boom of rockets and the crash of explosions. Beating back, the opposing snow-shoers retreat to the accompaniment of rolling volleys from the soldiers and finally the bugles sound the Cease Fire. All Quebec turns out to see the sight which attracts visitors from all eastern Canada and the United States. Picture shows one section of the battle front, an attack on the ramparts.

Knew His Canada

Essays Of Peter McArthur Should Be In School Books

It is fine to see that Peter McArthur is remembered. We have not so many real writers yet that we can afford to let one drop out of memory. Not that there is any real danger of Peter being forgotten, but there is danger that many Canadians may not have the chance to know that he lived and wrote. His essays are the sort of literature that ought to be in our school books, only our educational authorities do not quite know their business and leave them out in favor of British writers who are all very well in their way, but never heard of Canada, or if they did, only knew it as a place where the Hudson Bay Company collected fur.

Some day we shall have Canadian school books and we shall begin to bring up Canadian boys and girls in the way they should go, with a proper knowledge of Brita'n, of course, and not with that vague sense of the British Islands which the British Islands still have of Canada, but to know Canada as it is and as Peter McArthur knew it, and as Miss Carman knew it; and as Charles G. D. Roberts knows it and Robert Norwood, and Wilson MacDonald, and Duncan Campbell, Scott, and Wood, and Blake, and Burrell, and MacMechan, and Grove, and many another essayist who has not yet had the fortune to be discovered by the authorities, who have not time to read anything that has not been dead a long time.

We are grateful to the writer in the London Advertiser, who recalled Peter McArthur's essay "When the Rain Came" and added the words of appreciation and "soft recall" which brings him so vividly once more before us.

"Peter McArthur made no pretension to being a good farmer. Indeed he was rather inclined to poke fun at his own accomplishments in that regard, as when he told a meeting of live stock men that he wrote for a living and planned to amuse his neighbors. But he saw all that went on around an average Ontario farm and described them as they had never been described. Others had noticed that farm animals had each a personality of its own, but Peter McArthur was the first man to find in them an inexhaustible source of literary material."—Hamilton Herald.

Two Handy Articles

Farmers Would Find Note Book and Pencil Very Useful

In every farmers' pockets will be found a varied assortment of screws, nails, bolts, string, keys and a jackknife. But in few assortments are there found a small note book and a lead pencil as well. These two are very important and should go with the farmer wherever his work or pleasure takes him. Then when an idea comes to him he should write down the idea for future thought and use, instead of trusting to his memory. When he follows the latter course, nine chances out of a dozen he forgets, and as a result the idea is lost, probably forever. The pencil and notebook preserve it for later use. Once a pencil and notebook carrying habit is acquired, any number of uses will occur daily. When a memorandum book is found one learns to depend on it as a reminder of appointments and periodic duties.

Monoxide Gas Poisoning

Preliminary Symptoms Of Poisoning From Exhaust Of Motor Vehicles Are Given

Two preliminary signs of poisoning by carbon monoxide caused by the exhaust of motor vehicles in closed garages, consist of a slight swelling and hardening of the small arteries which anyone can feel beating in his temple, and also, a slight weakness of the muscles on the back of the legs.

This deadly gas has no smell and gives no ordinary warning. The victim merely faints and dies unless rescued. The remedies for carbon monoxide poisoning are fresh air, artificial respiration and other procedures which must be applied as soon as possible by a physician.

Offering Him More

The after-dinner speaker had waged eloquent for 15 minutes.

"After partaking of such an excellent meal," he continued, "I feel that if I had eaten any more, I would be unable to talk."

From the far end of the table there came a whispered order to a waiter, "Bring him a sandwich."

Sambo—"So you help your wife with the washing?"

Andy—"Yes, I tell the customers whether it's ready or not."

We are ruined not by what we need, but by what we think we need.

Outlook For Lithia Ore In Manitoba

More Than Sixty Per Cent. Of World's Known Commercial Deposits Found Within 100 Miles Of Winnipeg

The information coming from New York recently that a method had been perfected by which lithium can be extracted from the ore lithia on a commercial basis at about $15 per ton wholesale has created widespread interest among the mining fraternity of Manitoba.

The reason for the particular interest in Manitoba is due to the fact that accord ng to the most authentic information available, more than 60 per cent. of the world's known commercial lithia deposits are located in the Winnipeg and Bird River Districts, within 100 miles from the city of Winnipeg.

Lithia is found in three different kinds of rock, the lithia content of these ores of course being quite small and varying accord ng to the nature and the grade of the rock. Up to the present time lithia has been used chiefly for medicinal purposes.

The difficulty of recovering lithia itself by previous known methods has caused the price to be so high that it has always been sold by the ounce or by the pound. This recovery from the rock has been carried out mainly in Europe, especially in England and Germany, to which countries the lithia containing ores have been shipped.

It is important that the distinction between lithia and lithium should be kept in mind. Lithia is a mineral salt but lithium is a metal recovered from the lithia salt. Up to a short time ago the metal was so costly that it was quoted at $240 per pound, but according to the announcement made by Dr. W. C. McMaster, professor of chemistry before the New York Electrical society, the metal lithium can now be recovered at about $15 per pound.

While the demand for lithia, the mineral salt was naturally limited, the demand for the metal lithium, with its tremendous range of possibilities is practically unlimited and the knowledge that Manitoba contains large quantities of the lithia bearing ores is creating widespread interest.

Lithium is the lightest of all known minerals, being only about half the weight of water. It is a soft silver-white metallic element and its principal use is in alloys, particularly as an alloy in steel making. It loses its softness when combined with other metals and it has increased the lifting power of helium gas about 15 per cent. by one of its peculiarities which is sponge-like absorption of gaseous impurities.

The Manitoba lithia ores of a certain minimum content have been selling at $30 per ton at the rail head at Lac du Bonnet.

Many Drug Addicts

Ten Thousand Known Drug Addicts Living In Canada

Despite the fact Canada compares favorably on the question with other nations, there are 10,000 drug addicts in the Dominion known to the Department of Pension and National Health, Dr. Helen MacMurchy, director of child welfare work of the department stated in an address at Ottawa. Of this total not more than 2,000 are curable, and stricter legislation is required in some provinces to provide the necessary treatment for such cases.

Speeding Up Growth

Lilacs and flowering almonds blossoming in December, and potatoes sprouting two months earlier than under normal conditions are thought to be possibilities as the results of experiments at Mellon Institute in Pittsburg. The chemicals which do these things are derived from natural gas through processes evolved at the institute.

A shortage of fruit is reported from New York. We hope they won't make a song about it as they did when they ran out of bananas a few years ago.

"Yes, one can get used to anything, even to being dead."—Nagels Lustige Welt, Berlin.

WORLD HAPPENINGS BRIEFLY TOLD

During the past six years the foreign population in Paris has increased by more than 200,000, an official report reveals.

In a personal message to Mrs. Larkin, the King expressed the sympathy of Queen Mary and himself for the loss of Hon. P. C. Larkin, Canada's high commissioner.

The Austrian Government has established a consulate-general t Ottawa for Canada and Newfoundland, and Dr. Ludwig Kleinwaechter has been appointed to the post.

Farmers in Swedish Lapland have petitioned the government for help against invading reindeer herds belonging to the Nomad Lapps. In many places the peasants' entire winter supplies of hay and grain have been destroyed.

What is believed to be the first flight from Canada to Mexico City, was made by Flight-Lieut. N. C. Ogilvie-Forbes, of the Royal Canadian Air Force, who landed at the southern capital after a two weeks' flight from Montreal on a light aeroplane.

Raymond Poincare, former French premier, has returned to Paris from southern France, completely recovered from his recent operation, rested and feeling fit. He has been mentioned as a possible minister of finance in a reorganized Tardieu cabinet.

Great Britain's post office accounts for the past year record a profit of nine million pounds sterling. The telephone service shows a surplus of half a million pounds, while the telegraphs record a deficit of three quarters of a million pounds.

An appeal that the Dominion Government contribute one-third of the excess cost of relief employment, the remaining two-thirds of such excess being met by the provincial and municipal authorities, was made by Mayor Bert Wemp, of Toronto, to the Hon. Peter Heenan, Minister of Labor.

A SIMPLE TREATMENT FOR CHILDREN'S COLDS

Cold in the head is very common at this time of the year, especially in the very young. Neglect of a cold is prone to lead to serious consequences. To relieve all congestion of the system is the first step in treating a cold, whether in infants or adults. For the very young, Baby's Own Tablets are the ideal means of doing this. Containing no narcotics or other harmful drugs they soothe the child's fretfulness, relieve its suffering and ensure convalescence.

Baby's Own Tablets are without an equal for relieving indigestion, constipation and colic. They check diarrhoea; break up colds and simple fevers; promote health-giving sleep and make the dreaded teething period easy. The Tablets are the one medicine that a mother can give her little ones with perfect safety as they are guaranteed to be free from injurious drugs. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Game Sanctuary Closed

The Thelon Game Sanctuary, east of Great Slave Lake, consisting of 15,000 square miles, has been closed to both native and white hunters in order to protect the last known herd of Musk oxen, which are said to number around 250, and have their habitat within this area.

"Why are you riding without a light?"

"It is full moon."

"But you are not allowed to ride at night without a light even if the sun is shining."—Karikaturen, Oslo.

Recipes For This Week

(By Betty Barclay)

SWEET CROQUETTES

1 cup stale cake crumbs.
¼ cup chopped, blanched almonds or shredded cocoanut.
Grated rind of ½ lemon.
½ tablespoon lemon juice.
½ cup orange juice.
1 egg yolk.
1 egg white.
Fine cake crumbs.

Mix first four ingredients in saucepan, add orange juice, to moisten, and let stand ten minutes. Heat to boiling point; remove from fire; add egg yolk, and cool. Shape as croquettes; dip in egg white, beaten slightly, with one tablespoon cold water; roll in sifted dry bread or cake crumbs, and fry in deep fat. Sprinkle with powdered sugar, and serve with chocolate sauce.

GALANTINE

(Serves 8-10)

1 pound round steak.
1 pound raw ham.
2 eggs.
1¾ cups bread crumbs.
¼ teaspoon nutmeg.
¼ teaspoon pepper.
1 teaspoon salt.
Juice of 1 lemon.
Grated rind 1 lemon.

Put meat through a food chopper. Add eggs well beaten and remaining ingredients. Pack into a well greased pan, cover with buttered paper and steam for four hours. Serve cold, thinly sliced.

Winnipeg Newspaper Union Fashions

(By Annebelle Worthington)

Coppersheen diagonal lightweight woollen makes this jaunty utility all-day dress so entirely suitable for immediate wear. The hip, waist, neck, and sleeve bands are of plain faille silk crepe in harmonizing shade. Yellow faille crepe gives lingerie touch at neckline.

Style No. 3238 is designed in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

It's very French, and a dress that you'll only find in exclusive shops, so take this opportunity to copy it for a very small outlay.

It is equally suited to faille silk crepe and is stunning in dahlia purple shade with just a touch of eggshell crepe at neckline.

In black crepe satin, it's an excellent choice for smart matron. Cut the bands from the dull surface of the crepe to contrasting effect. The neckband may be cut from the dull side or of white crepe silk.

Emerald green silk crepe is youthful with self-fabric trim.

Pattern price 25 cents. Be sure to fill in size of pattern.

Motor Truck Licenses

Saskatchewan Government In Making New Regulations Has No Desire To Hamper the Farmer

The Saskatchewan Government has decided to place the motor license branch under the jurisdiction of the Minister of Highways, being of the opinion that the administration thereof logically belongs to the Highway Department. It has been hitherto under the Provincial Secretary. This intention will be implemented at the next session of the Legislature.

The Minister of Highways announces that the Government has recommended the regulations relative to motor truck licenses. He points out that by the reduction of the car license fees the revenue of the province will be reduced this year to the extent of approximately $600,000.00. The change in the truck license fees was inaugurated with the purpose of assisting the revenue as well as to insure that trucks used for commercial purposes would pay their share for the use of the roads of the province. These new regulations were based on the Ontario regulations, being on a slightly lower scale throughout than the fees charged in Ontario. The new fees are also lower than those charged in the province of Alberta, and many other provinces and states.

Out of 250 truck licenses already issued this year, 69 were registered at the same fee as formerly, and 25 registered for a fee only exceeding last year's rate by $2.00 or $3.00, that is 27 per cent. of the registrations shows that no increase has taken place and 10 per cent shows an increase of $3.00 or less. It is also estimated that 50 per cent. of those who own trucks also own private cars and profit by the $5.00 reduction in car licenses.

It was not the desire of the Saskatchewan Government to in any way hamper the farmer in the use of trucks by increasing license fees materially, in view of resolutions received from some of the municipalities; however, the Government has investigated and ascertained that approximately 85 per cent. of the trucks are owned outside of the cities of the province, namely, 16 050 out of a total registration of 18,669. A large number of these are farm trucks used in the hauling of grain in the fall, and it was thought that by making the one-half yearly license fee from October 1st, as formerly, to September 1st, as under the new regulations, this would furnish a one-half yearly license fee for a great number of the farmers. Upon further investigation, however, the Government have arrived at the conclusion that this may not meet the situation, and it is anxious that nothing shall be done that will in any way tend to hamper the farmer.

It would further appear that a number of trucks used in the cities contribute the provincial license tax, gasoline tax as well as the city tax, and do not proceed beyond the boundaries of the city or make any use of the provincial roads. It is felt that some measure of relief should be granted in that regard and also with regard to the farmer, although no such relief apparently is granted in any of the other provinces or the states of the Union, as far as the information at hand shows.

While they are anxious to secure as much revenue as possible for road building purposes, the Saskatchewan Government decided to pass a further order-in-council, the effect of which will be to give a one-half yearly license fee for all truck owners purchasing their licenses after September 1st. And further, that upon any resident of a town or city taking a statutory declaration at the end of the year to the effect that his or her truck has not proceeded beyond the boundaries of the town or city during the course of the year, such owner will be entitled to a refund of the difference between the amount charged under the new regulations in excess of the regulations formerly in effect, and that upon any bona fide farmer taking a declaration to the effect that his or her truck has only been used during the year, exclusively for farm purposes, that such farmer will be entitled to a refund of any excess charged under the new regulations over the previous regulation. The minister points out that should a farmer use the truck for other than farm purposes, such as gravelling work, he will in most cases, under the new regulations, pay very little, if any, more and should be treated under the commercial classification.

It is the intention of the minister to collect data during the year on the purposes for which the trucks in the province are used, this data to be incorporated on the application for the license and to seriously consider issuing a different motor license plate for trucks coming under the above classes for the year 1931, in order to assist in preventing any breaches of the regulations.

He has also ascertained that many trucks from outside the boundaries of the province have hitherto been engaged in work in the province, such as gravelling without paying any license fee to the province. The minister is considering licensing all trucks coming into the province to do work in competition with the truck owners of the province. The regulations under the motor vehicles act with regard to keeping to the right of the road, speed, etc., particularly with regard to gravel trucks, will be rigorously enforced this year.

New British Dirigible

The new British airship, R-100 will not be flown to Canada until the spring. Whether the giant vessel will be kept in its hangar in the meantime is doubtful. The suggestion is being put forward that she should make a comprehensive tour of Europe, which would enable her crew to gain further experience in the handling of the great vessel.

Rattlesnake serum used in the United States is largely imported from Brazil.

Winter Fair In March

Attractive Prize List Arranged For Annual Event In Regina

Very little change will appear in the prize lists for the Regina Winter Fair, according to announcement made by the Winter Fair officials.

The Saskatchewan Winter Fair will be held on March 25 to 28, in the Regina Stadium and adjoining stables on the Exhibition grounds. An attractive prize list is being offered the exhibitors with over $12,500 in cash prizes, several silver medals and trophies. In the heavy horse department there are classes for Clydesdales, Percherons and Belgians, with $1,435, divided $1,070 for pure breds, and $365 for commercial horses, in each class. A class which is attracting much attention is the one for boy exhibitors of colts or fillies foaled in 1929, $360 is offered in this class including $100 from the Clydesdale Horse Association of Canada. The Dominion Government offers $400 for groups of five commercial heavy draft horses.

In the light-horse department there are classes for standard breds, roadsters, saddle horses and R.C.M.P. horses.

For beef cattle, classes are offered for purebred or grade steers and grade heifers or Shorthorns. Herefords or Aberdeen-Angus breeding; $445 is offered in each of the three classes. The Dominion Government offering for beef cattle is for car lots of 15 animals and groups of five with $1,800 in prizes.

In the boys' and girls' classes for calves of 1928 and 1929, the prizes amount to $450.

Last year the poultry show was held by itself in January, but to meet the wishes of the majority of the poultry exhibitors, the show will be combined with the spring show this year. Classes include the principal varieties of utility poultry, turkeys, geese, ducks, pigeons and pet stock. Prizes in the poultry department amount to $1,700. Entries close on March 15 for both livestock and poultry entries.

Beethoven was only 12 years old when he became organist in a church at Bonn, Germany.

Plans For Poultry Congress

Large Space Is Reserved For Exhibits From Canada

The World's Poultry Congress to be held in London, in July of this year, promises to be carried out on a more elaborate scale even than the third congress which was held in Ottawa three years ago. This is the view expressed by Mr. Percy Francis, director of the congress, who accompanied Mr. F. C. Elford, president of the World's Poultry Science Association, when he visited many European countries and the Near East a few months ago.

The London congress is being supported and carried through by the Ministry of Agriculture and Fisheries of England, and the Department's of Agriculture in Scotland and Northern Ireland. Of the 45 countries participating in the congress, 31 are reported to have set up national committees, or their equivalent, for the purpose of organizing their representation at the congress. Canada's exhibit will occupy a very important place among the national exhibits.

At a meeting of the central committee, held in Ottawa, recently, there was presented a plan of the floor space to be used in the Crystal Palace where the congress is to be held. This shows that a 96-foot frontage with a 22-foot depth is to be devoted to the provincial exhibits. For the commercial exhibits from Canada a 120-foot frontage with a depth of 24 feet is to be used. space will accommodate the World's Grain Exhibition, and the Association of the British Columbia Record of Performance for Poultry, and various other associations.

At the recent meeting, Professor W. A. Maw, of Macdonald College, who is chairman of the program committee, stated that Canada will present 15 papers covering such subjects as breeding, incubation, nutrition and rearing, diseases and their control, and economics, including marketing.

Mr. L. F. Burrows, secretary of the Canadian Congress Committee, announces that in order to maintain a certain uniformity in the appearance of the entire provincial exhibits the congress committee of management has agreed to build the entire front of the stands and the background. This work will be executed under the direction of J. O. Turcotte, Canadian Exhibition Commissioner.

National Research Building

Nova Scotia stone is to be the main ingredient in the new $2,000,000 building of the National Research Council, at Ottawa, it is announced by the firm of contractors, Robertson and Janin, Limited, of Montreal.

The Long Talkers

If you think women talk too much you never heard the man who introduces the speaker of the evening.

Normally, temperature drops about one degree every 100 meters increase in altitude.

The city of Prague, in Czecho-Slovakia, has a pawn shop which lends money on automobiles.

BOILS GO OVERNIGHT
"Many Boils on neck. Doctor said lance. Tried 'Sootha-Salve' first; boils vanished overnight." C. T. Scott. "Sootha-Salve" stops pain in 1 minute; boils go in few hours. At all druggists.

Smallest War Memorial

Record Of Workmen In London Block Who Served In War

It is still a moot point as to where in London one encounters the smallest war memorial, writes "Looker On" in the London Daily Chronicle. The smallest I have come across is a glass case on the front of a block of workmen's flats on Albert Embankment, near Vauxhall. It is a simple, home-made affair enshrining only about a score of names of men living in the block who served in the war, with a cross marked against those who fell. All these years—it was apparently started during the war—it has been carefully tended by the tenants; there are always one or two blooms in glass jam-jars in front of it. A humble but faithful tribute of remembrance.

"Snow Boots" In Paris

There is no word for galoshes in French, so Paris has adopted "snowboots" as the correct term for overshoes for winter sports. There is no other justification than winter sports for galoshes, to the French woman's mind. Only foreign women wear overshoes or rubbers in Paris on wet days. French women stay at home or take a taxicab when it rains. Failing that, they prefer getting their feet wet to covering them with waterproofs.

DO YOU SUFFER FROM CONSTIPATION?
Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.
Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.
A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

When BABIES are upset

Baby ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea—a condition it is always important to check quickly. How would you meet this emergency—tonight? Have you a bottle of Castoria ready? There is nothing that can take the place of this harmless but effective remedy for children; nothing that acts quite the same, or has quite the same comforting effect on them.

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will aid and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria; the genuine bears Chas. H. Fletcher's signature on the wrapper.

CHAPTER I.—Continued

The presence of the little shop in the front room did not cheapen the old house in Charmian's loving eyes. As a child the contents of the high-boy drawers had fascinated her. Now she regarded them as something that helped to give her grandmother a few comforts. Had any one suggested that they might be better off in a smaller place, she would have been as horrified as would Grandma herself. The view from her own window amply repaid her for the care of so large a room. With an unerring sense of beauty she clung tenaciously to the fine pieces of old mahogany with which her great-great-grandfather had furnished his family mansion, smiling with inward scorn at the golden oak or mission furniture that was the pride of some of her friends and neighbors.

"Grandma, it is true, rather lacked the adoration of the antique. She gazed rapturously at the mail order catalogues from Chicago, and was particularly enamored of an orhate oak hat tree; while Charmian, knowing that there was no possibility of her grandmother making such a rash purchase, smiled indulgently, and let the old lady dream.

"If only the school committee decides to give me District Four!" she sighed a dozen times a day, and planned how every penny she could save should go toward beautifying the old home. Even as it was, tourists (they had such things in Wickfield now), would sometimes stop their automobiles and admire the gilded pineapple above the door, despite the fact that its coat of goldleaf was slowly vanishing before the snow and ice of the New England winters.

Charmian had been thinking of the pineapple this very morning, and wondering what it would cost to gild it, when the doctor sat down upon the steps. As his eyes came back from the syringa bush and met her own, she continued, almost apologetically: "I know it's too big a house for Grandma and me, but—"

"Why not take a boarder?" he broke in. "You've plenty of empty bedrooms, goodness knows."

Charmian was silent for a moment, letting the thought sink in.

"But you see," she began dubiously, "I couldn't manage the meals — not if I get the school, anyway. As it is, it's a scramble to fix a lunch for Grandma, or was when I went to Normal. If only some one wanted just a room—but there! nobody in Wickfield does, or ever has!"

The doctor seemed to be lost in thought. Then he looked up at Charmian and smiled. She made a pretty picture, there on the top of the low stepladder. Her old blue linen, though faded with many washings, still did good work in bringing out the blue of her dark-fringed eyes; and her cheeks were flushed.

"A penny for your thoughts, Doctor," she said.

The old man shook his head.

"They're not the sort I'd prescribe for an innocent-looking miss like you," he answered, "and yet," (a sudden twinkle appearing in his gray eyes), "I think I'll tell them. I was wondering, my dear, why some likely chap hadn't run away with you."

The girl threw back her head and laughed, adding much to the charm of an already charming picture.

"But you see," she at last asserted, "though I wouldn't breathe it to the public, there are no likely chaps in Wickfield."

"No?" questioned the doctor, frowning. "What's the matter with George K's boys? or Jimmy Bennett? Jim's a splendid fellow, or I never knew one; and some one told me (either a little bird or Lizzie Baker), that—well . . . ."

Charmian laughed again.

"You surprise me, Doctor Howe — a close-mouthed man like you listening to gossip! But I'll admit that my statement was rather sweeping. Of course George K's boys are splendid; but they're away from home, and two of them are married anyway. As for Jim, I can't just see him in the light of a young Lochinvar. He'd never dare elope with any one without first asking permission of his mother."

"And is filial devotion a quality to be scorned?"

Although there was mirth in the doctor's eyes, Charmian's face sobered.

"Sometimes," she answered quietly, "sometimes, Doctor Howe, I think it is—when one carries it as far as Jim does. I can't imagine his asking a girl to marry h'm without first dissecting her with his mother. Do you think any self-respecting woman would stand for that?"

The indignation of these last words brought the doctor's eyes suddenly and disconcertingly to bare.

"So you've been—dissected?" Charmian blushed.

"You know entirely too much," she said severely, "and anyway, I don't see how we reached this subject. We began with boarders, and—"

"Which is what I was for," interrupted the doctor. "You see, Charmian, my dear, I'm getting old."

"Not you!" laughed Charmian, and coming down from the ladder she seated herself beside him on the steps.

"Nothing truer," he went on soberly. "I find it more difficult to be routed out at night than I did once. I feel more tired after a day's work; but—but I'm not ready to give up—yet."

"I should say not!" Charmian responded, slipping a comforting hand into the old man's. "What should we do without you?"

He smiled.

"You'd do very well—probably better than you do now. Old folks are set in their ways, and ways are changing all the time you know. But I need help. I need an assistant — a young, up-to-date assistant.

"He'd starve—in Wickfield. We wouldn't have him near us."

"Not even to help me out?"

The girl looked up, suddenly serious.

"You really mean it, Doctor?"

"Yes, I mean it. I'm getting tired, Charmian, though I haven't been willing to face the truth. What I stopped here for, my dear, was to ask if you'd take the boy to board."

"The boy? You mean a new doctor?"

He laughed at her startled face.

"Why not? You've room enough and to spare. If you can't manage his meals he could get them at the Central House, I suppose; but I don't think he'd enjoy living there. Would you?"

Charmian shuddered at the idea, but asked: "What will Grandma say?"

"She'll agree to anything you think best," ignited the doctor. "I know Grandma! Well, dear child, you think it over. I don't want to put any more burdens on your shoulders; but he'll pay well, and—Look here! He's coming up on Saturday. I'll drop him in casually and let you look him over."

"I shan't need to look him over if you recommend him," she said as they arose. "But of course, he'll want to look at us! If he could get his dinners down town I think I could manage the rest. As for Grandma—"

"Charmian," called the old lady from her window, "what on earth are you two talking about all this time? You tell the doctor to step in a minute before he goes. I want to ask him about my rheumatism."

CHAPTER II.

As the doctor went within at Grandma's call, Charmian lifted her little stepladder and carried it back to the woodshed where it belonged. She was an orderly soul, but this morning it was only habit that made her pause at the door to see if everything was in its place. Her thoughts were not centered upon woodsheds, stepladders, or the neat pile of kindlings in the corner. She was thinking of the doctor's confession about getting "tired." What he meant, of course, was getting old. The idea brought a strange, sick feeling to Charmian's heart. What would life be in Wickfield without its doctor?

The girl sank down on the side steps and looked off dreamily at the distant hills—hills so softly blue that they seemed to her imaginative vision to be wrapped in a chiffon veil. She was thinking: "Of course I'll board him, even if it's a bother. It'll help the doctor, and there's nothing I wouldn't do for Doctor Howe—just nothing."

Her eyes strayed to the orchard where a small rustic table was built beneath a tree. The doctor had built it years ago. How many, many times had he joined her there at her doll tea parties? she mused. What hadn't he done for her, and for all other Wickfield youngsters?

How he loved them—the children! It seemed to Charmian when she grew old enough to learn that this dear friend had lost his best beloved in a cruel accident on what was to have been her wedding eve, that she and the other children of the neighborhood had been to him, in a measure, the babies that might have been his own. In those days his buggy was filled with all of children. "The more the merrier," he would say, stopping to take in the boys and girls on their way to school. Pandora, his old white mare, needed no reins, and would "slow up" at sight of any small figure trudging along the road. Pandora was in pasture now, an honored boarder, and, except when the snowdrifts were too deep, the doctor travelled in a "flivver." His was the first automobile to be seen in Wickfield. Indeed, when he drove for the first time and waved a hand, Grandma Davis had almost fallen from the window in her excitement.

"It doesn't seem quite right," she said to Charmian. "What's the world coming to, I'd like to know? I declare, I wouldn't have thought it if Edward Howe!"

(To Be Continued)

A certain man announced that he was marrying a widow.

"I could never be a widow's second husband," his friend said bluntly.

The newly engaged man smiled.

"Well," he murmured, "I'd much rather be her second than her first."

Fortune-teller: Do you want to know about your future husband?

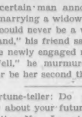
Visitor: No. I want to know something about the past of my present husband for future use.

NERVES WERE BAD

Could Not Sleep Tired All Day Long

Miss Florence Coutier, Bark Lake, Ont., writes:—"I was troubled with my nerves, could not sleep at night, and felt tired all day long.

"A neighbor came in to see me, one morning, and advised me to take



"The first box did me good and after the sixth box I was able to go back to my work."

Don't dose a Child's Cold

CONTINUAL dosing upsets children's delicate stomachs. Vicks is applied externally and therefore cannot disturb the digestion. It acts in two ways:

(1) The body heat releases the ingredients in the form of vapors which are inhaled.

(2) At the same time Vicks "draws out" the soreness like a poultice.

acts 2 ways at once

VICKS VAPORUB

OVER 17 MILLION JARS USED YEARLY

China's Real Menace

Famine Takes Toll Of Millions Of Lives Every Year

We hear often of China's civil wars, but only occasionally do dispatches come through which tell of the real horror which continually hangs over that troubled country. This is famine. There have always been thousands of people starving in China; there are today. Famine is remorseless and unending, a grim and horrible specter which stalks through the land after every drought or flood, taking an annual toll of millions of lives. So scant is the margin of food which separates the peasant class of Chinese from hunger, that whenever crops fail, the next winter demands its victims on a scale which we of the West dare not contemplate.

Today it is the Provinces of Shansi and Shensi, which are in the grip of famine. In the past twelve months one-third of their population of 6,-000,000 has perished of hunger and another 2,000,000, it is believed, will be dead before June. It is impossible to transport supplies into these regions even when they are available, for the peasants have smashed their carts for firewood and eaten their horses and mules. Over an area of 5,000 square miles a doomed people is subsisting on roots and bark, chaff and elm leaves.

On top of all this, the winter has proved more severe than usual, and cold added its horrors to the suffering of the peasants. An American investigator tells of passing through village after village where only five or ten persons remained alive. The local authorities are helpless and in many instances slowly starving to death themselves.

Civil war affects thousands, but famine affects millions. It is the great problem which from a humanitarian standpoint China is called upon to face. Yet the situation is virtually hopeless. Temporary relief may prolong a few lives, but it can do no permanent good. Not until the country is stabilized with peace and order firmly enforced, a net-work of modern roads built, vast dams and irrigation works constructed and the peasants taught to utilize every means at their disposal to increase and conserve their crops will there be any chance that famine will be overcome.

In the meantime millions of people are starving and millions more will starve year after year. That is a side of China of which we may hear little, but which is of far larger extent than the China of extra-territoriality and foreign concessions. — New York Evening Post.

Ancient Finger Prints

Were Used Centuries Ago In Orient As Signature

Finger prints were taken centuries back in China and Japan. They were then used as a means of signing documents, although nowadays they are generally taken as a method of identifying criminals.

A finger print, taken on paper by means of printing ink, from a human finger shows markings peculiar to that person by the lines on the skin. The arrangement of these lines is the same all through life, and no two persons have the same marking.

No Time Lost

An Indianapolis business man, known for rigorous allegiance to his duties, was asked how he found time to go to the movies with his wife almost every week.

"Well, you see, it's this way: I find it doesn't take any more time to go than to hear the whole story of the thing after my wife returns."

Check Falling Hair with Minard's.

Astronomer Says Moon Moves Earth's Crust

Gravitational Pull Shifts Surface Six Feet In Estimate

That the earth's crust actually shifts a result of the gravitational pull of the moon on the earth was a theory advanced in a paper written by Dr. Harlan T. Stetson, and read before the American Astronomical Society at Harvard College. He is the director of Perkins Observatory at Ohio Wesleyan University.

Dr. Stetson's subject was the study of the variation in latitude with the moon's position. While movement of the earth's crust has long been known to scientists, it was believed to be too slight for measurements. Observations analyzed by Dr. Stetson showed, however, that the change of position may amount to five or six feet or more.

Changes in the position of the moon, Dr. Stetson's paper pointed out, produce a change in the direction of gravity, causing the shift in the earth's crust and thus the variation of latitude.

Overcome Sleeping Sickness

Medical Science Has Prevented Population Of French Equatorial Africa From Being Wiped Out

Medical science has prevented the population of French equatorial Africa from being wiped out by sleeping sickness, it was declared in an interview by Raphael Antonetti, Governor-General of the colony, who is now in Paris.

Although the birth rate was satisfactory, he explained, the population continued to diminish through disease, which caused more deaths than there were births. This went on until 1921, when the French officials recognized the peril and took energetic action against sleeping sickness and all tropical infections.

Canada's Contribution

Permanent Posts Established In Polar Regions Are Invaluable

Canada is making a notable contribution to Arctic research in the establishment of permanent posts in the Polar regions, said G. P. MacKenzie, of the Canadian Department of the Interior, who led the expedition which sailed on the "Beothic" last year, exploring Arctic regions, in speaking before the Women's Canadian Club in Toronto.

"Unquestionably Canada is making a greater contribution than are the explorers who merely go in and out of the Arctic leaving no permanent establishment behind them," he said.

For Burns and Scalds. — Dr. Thomas' Eclectric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

Little Helps For This Week

"I am the Lord, I change not." — Malachi iii. 6.

Let nothing disturb thee,
Nothing affright thee;
All things are passing,
God never changeth.
Patient endurance
Attaineth to all things;
Who God possesseth,
In nothing is wanting;
Alone God sufficeth.
—Santa Teresa's Bookmark.

Life passes, riches fly away, popularity is fickle, the senses decay, the world changes, friends die. One alone is constant; One alone is true to us; One alone can be true; One alone can be all things to us; One alone can supply our needs; One alone can train us up to our full perfection; One alone can give a meaning to our complex and intricate nature; One alone can give us tune and harmony; One alone can form and posses us. Are we allowed to put ourselves under His guidance? This surely is the only question.—John Henry Newman.

Persian Balm is irresistibly appealing to all women who appreciate charm and elegance. Its use keeps the complexion always clear and beautiful. Tonic in effect. Stimulates the skin and makes it wonderfully soft-textured. Softens and whitens the hands. Persian Balm is equally invaluable to men as an excellent hair fixative and cooling shaving lotion Splendid also to protect the tender skin of the child.

Business Is Business

Diplomacy Used By Jewish Scholar To Win Prize

There was a Scotsman who was appointed inspector of schools, and who in the course of his work had to examine a Jewish school. He asked a class of boys who in their opinion was the greatest man the world had ever produced. After a pause a little Jewish scholar put up his hand, and declared that the greatest man was Robert Burns. This reply gained him the prize that was offered. After the examination the inspector asked the lad if he really thought Robert Burns was the greatest man to which the reply came: "Moses was the greatest man, but Business is business."
